Geodatabase Training for Data Managers, Database Administrators, and GIS Professionals

The following training options teach you how to store, manage, update, and secure your organization's geographic information system (GIS) data in a central location for easy access and management. Visit **www.esri.com/gdbtraining** for detailed course descriptions and registration information. Visit **www.esri.com/podinstruct** to listen to the Instructional Series podcasts.

Data Managers

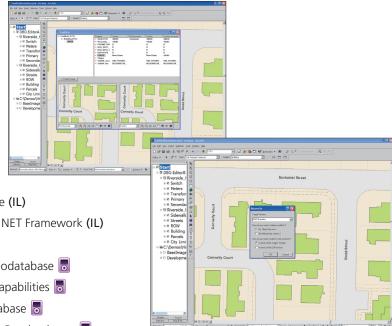

- System Architecture Design Strategies (IL)
- Geodatabase Design Concepts (IL)
- Building Geodatabases (IL)
- QA/QC for GIS Data (IL)

Database Administrators

- ArcGIS® Server Enterprise Configuration and Tuning (for Oracle and SQL Server) (IL)
- Data Management in the Multiuser Geodatabase (IL)
- Managing Editing Workflows in a Multiuser Geodatabase (IL)
- ArcGIS Server: Web Administration Using the Microsoft .NET Framework (IL)
- Creating Desktop and Workgroup Geodatabases
- Best Practices: Loading Raster Data into an Enterprise Geodatabase
- Geodatabase Archiving: Introduction to Concepts and Capabilities
- Five Best Practices for Maintaining an Enterprise Geodatabase
- Administering and Maintaining Desktop and Workgroup Geodatabases

GIS Professionals (Editors, GIS Specialists, Technicians, Analysts, Cartographers)

- Building Geodatabases (IL)
- Introduction to the Multiuser Geodatabase (IL)
- Data Production and Editing Techniques (IL)
- Creating, Editing, and Managing Geodatabases for ArcGIS Desktop (W)
- Creating and Editing Parcels with ArcGIS Desktop (IL)
- Working with CAD Data in ArcGIS Desktop (ILV)
- Working with Cartographic Representations (IL)
- Working with Geodatabase Subtypes and Domains (W)
- Geodatabase Archiving: Working with Archived Data
- Geodatabase Replication: An Overview
- Geodatabase Replication: Working with Replication

Training Legend

- **IL** Instructor-Led Course
- **ILV** Instructor-Led Virtual Classroom Course
- W Virtual Campus Web Course
 - Instructional Series Podcast
