# Sustainable World Community Events and Activities

Visit the Sustainable World Community (SWC) to connect with leading organizations applying GIS to solve conservation, humanitarian, and sustainable development challenges around the globe. Engage directly with 35 special exhibitors from nonprofits, NGOs, and international organizations all working to make the world a better place by applying the Science of Where to respond to humanitarian crises, support sustainable development, protect critical habitats, preserve places that matter, and more. The showcase will feature a Demonstration Theater where organizations will be sharing their best work. Details on demo theater presentations can be found in the Online Agenda by filtering for "Sustainable Development". A Demonstration Tower will also feature Esri technical demonstrations on the advancement of the ArcGIS Platform to serve the Sustainable World Community. Don't forget to track live updates during the event on Twitter via **#EsriSWC.**
