

# Contents

- Preface ····· ix
- Acknowledgments ····· xi
- About this book ····· xiii
  - Software requirements and licensing ····· xiii
  - Installing the tutorial data ····· xiv
  - Resources, feedback, and updates ····· xiv
  
- Part 1 Using, making, and sharing maps ····· 1**
  - Chapter 1 Introducing ArcGIS ····· 3**
    - Tutorial 1-1: Getting an overview of ArcGIS Pro ····· 4
    - Tutorial 1-2: Navigating ArcGIS Pro ····· 13
    - Tutorial 1-3: Working with attribute data ····· 19
    - Tutorial 1-4: Symbolizing maps ····· 26
  - Chapter 2 Map design ····· 31**
    - Tutorial 2-1: Symbolizing qualitative attributes ····· 32
    - Tutorial 2-2: Labeling features and configuring pop-ups ····· 35
    - Tutorial 2-3: Filtering with definition queries ····· 38
    - Tutorial 2-4: Creating choropleth maps for quantitative attributes ····· 42
    - Tutorial 2-5: Displaying data using graduated and proportional point symbols ··· 46
    - Tutorial 2-6: Normalizing population maps with custom scales ····· 48
    - Tutorial 2-7: Creating dot density maps ····· 53
    - Tutorial 2-8: Setting visibility ranges ····· 55
  - Chapter 3 Maps for end users ····· 59**
    - Tutorial 3-1: Building layouts and charts ····· 60
    - Tutorial 3-2: Sharing maps online ····· 67
    - Tutorial 3-3: Creating a story in ArcGIS StoryMaps ····· 73
    - Tutorial 3-4: Creating a dashboard in ArcGIS Dashboards ····· 78

<b>Part 2 Working with spatial data</b>	<b>85</b>
<b>Chapter 4 File geodatabases</b>	<b>87</b>
Tutorial 4-1: Importing data into a new ArcGIS Pro project	88
Tutorial 4-2: Modifying attribute tables	92
Tutorial 4-3: Carrying out attribute queries	100
Tutorial 4-4: Aggregating data with spatial joins	109
Tutorial 4-5: Using central point features for polygons	110
Tutorial 4-6: Creating a new table for a one-to-many join	112
<b>Chapter 5 Spatial data</b>	<b>115</b>
Tutorial 5-1: Working with world map projections	116
Tutorial 5-2: Working with US map projections	119
Tutorial 5-3: Setting projected coordinate systems	120
Tutorial 5-4: Working with vector data formats	124
Tutorial 5-5: Working with US Census map layers and data tables	128
Tutorial 5-6: Downloading geospatial data	134
<b>Chapter 6 Geoprocessing</b>	<b>141</b>
Tutorial 6-1: Dissolving features to create neighborhoods and fire divisions and battalions	142
Tutorial 6-2: Extracting and clipping features for a study area	145
Tutorial 6-3: Merging water features	148
Tutorial 6-4: Appending firehouses and police stations to EMS facilities	149
Tutorial 6-5: Intersecting features to determine streets in fire company zones	151
Tutorial 6-6: Using Union on neighborhoods and land-use features	154
Tutorial 6-7: Using the Tabulate Intersection tool	158
<b>Chapter 7 Digitizing</b>	<b>163</b>
Tutorial 7-1: Editing polygon features	164
Tutorial 7-2: Creating and deleting polygon features	171
Tutorial 7-3: Using cartography tools	176
Tutorial 7-4: Transforming features	178
<b>Chapter 8 Geocoding</b>	<b>185</b>
Tutorial 8-1: Geocoding data using zip codes	187
Tutorial 8-2: Geocoding street addresses	192

**Part 3 Applying advanced GIS technologies** . . . . . 197

**Chapter 9 Spatial analysis** . . . . . 199

        Tutorial 9-1: Using buffers for proximity analysis . . . . . 200

        Tutorial 9-2: Using multiple-ring buffers . . . . . 202

        Tutorial 9-3: Creating multiple-ring service areas for calibrating a gravity model . . . 204

        Tutorial 9-4: Using Network Analyst to locate facilities . . . . . 212

        Tutorial 9-5: Performing data cluster analysis . . . . . 216

**Chapter 10 Raster GIS** . . . . . 223

        Tutorial 10-1: Processing raster datasets . . . . . 224

        Tutorial 10-2: Making a kernel density (heat) map . . . . . 231

        Tutorial 10-3: Building a risk index model . . . . . 237

        References . . . . . 250

**Chapter 11 3D GIS** . . . . . 251

        Tutorial 11-1: Exploring a global scene . . . . . 252

        Tutorial 11-2: Creating a local scene and TIN surface . . . . . 255

        Tutorial 11-3: Creating z-enabled features . . . . . 258

        Tutorial 11-4: Creating features and line-of-sight analysis using lidar data . . . . . 261

        Tutorial 11-5: Working with 3D features . . . . . 271

        Tutorial 11-6: Using procedural rules and multipatch models . . . . . 275

        Tutorial 11-7: Creating an animation . . . . . 279

Data source credits . . . . . 283
