Table of Contents

Esri resources for your organization

Course introduction

- Course introduction
- Course goals
- Installing the course data
- Training Services account credentials
- Icons used in this workbook

1 Getting started with ArcGIS Pro

- Lesson introduction
- ArcGIS Pro features
- Template options for creating an ArcGIS Pro project
- Project structure
- ArcGIS Pro interface
- Exercise 1: Use map navigation and data exploration tools
 - Create a project
 - Add a folder connection
 - Add layers to the map
 - Navigate the map
 - View feature attributes
 - Select features interactively
 - Change the basemap
- Lesson review

2 Working with GIS data

- Lesson introduction
- GIS data models
- Spatial data properties
- Locating key data properties
- Exercise 2A: Connect to data sources in ArcGIS Pro
 - Add shapefiles to a map
 - Add geodatabase feature classes to a map
 - Add data from ArcGIS Online to a map
- Getting data into a geodatabase
- Exercise 2B: Populate a geodatabase with data
 - Use ArcGIS Pro without a template
 - Create a file geodatabase
 - Transfer data between geodatabases

- Import a shapefile into a geodatabase feature class
- Import multiple feature classes into a geodatabase
- Convert tabular data
- Convert online data

Lesson review

Answers to lesson 2 questions

3 Coordinate systems

Lesson introduction

Differentiate between coordinate system types

Geographic transformations

Importance of projected data

Projecting data

Exercise 3: Change coordinate systems

- Import a map file

- Inspect spatial reference properties

- Inspect on-the-fly projection and transformation settings

- Set datum transformation for a map

- Transform datum for source data

- Explore a shapefile coordinate system

- Project a shapefile

Lesson review

Answers to lesson 3 questions

4 Symbolizing layers

Lesson introduction

Attribute types and layer symbology

Types of layer symbology

Differentiating between layer symbology

Classification methods

Selecting a symbology option

Exercise 4: Symbolize layers using different methods

- Use unique values

- Use graduated colors

- Use graduated symbols

- Symbolize features by density

Lesson review

Answers to lesson 4 questions

5 Controlling feature display

Lesson introduction

Types of selection queries

Selecting features using queries

Exercise 5A: Use queries to select features

- Import a map file

- Create an attribute query

- Add a second clause to an attribute query

- Create a selection layer

- Create a spatial query based on distance

- Create a spatial query based on a geometric intersection

- Create a new feature class from selected features

Definition queries

Displaying features at different scales

Symbol classes

Exercise 5B: Control the visibility of features

- Set scale ranges on layers

- Use scale-based symbol classes

- Create a definition query

- Modify a definition query

- Create multiple definition queries for a layer

Lesson review

Answers to lesson 5 questions

6 Adding text to a map

Lesson introduction

Defining characteristics of map labels

Exercise 6A: Add and modify labels

- Add a layer to a new map

- Label features

- Change the label field

- Modify the label font

- Change the label position

Using label classes

Exercise 6B: Create label classes

- Explore attributes

- Create label classes

- Define criteria for label class type 1

- Define criteria for label class type 2

- Define criteria for label class type 3

- Set scale dependencies on label classes

Geodatabase annotation

Choosing standard or feature-linked annotation

Create and modify geodatabase annotation

Lesson review
Answers to lesson 6 questions

7 Creating features from tabular data

Lesson introduction
Indirectly storing spatial data
Evaluate tabular data
Displaying tabular data on a map
Exercise 7: Create point features from x,y coordinates
 Import a map
 Explore tabular data
 Create point features from a table containing x,y coordinates
Lesson review
Answers to lesson 7 questions

8 Associating tabular data

Lesson introduction
Table relationships
Common table management items
Exercise 8A: Prepare tabular data
 Explore tabular data
 Export the CSV file into a geodatabase
 Calculate a field
Table cardinality
Joins and relates
Exploring joins and relates
Choosing joins or relates
Exercise 8B: Create table associations
 Join tables
 Use joined fields
 Export a joined layer
Lesson review
Answers to lesson 8 questions

9 Editing features and attributes

Lesson introduction
Editing features
ArcGIS Pro editing environment
Exercise 9A: Create features by digitizing
 Open a map
 Create a new feature class

- Modify a feature template
- Digitize a polygon
- Update attributes
- Digitize line features
- Feature modification tools
- Exercise 9B: Modify existing features
 - Modify vertices
 - Reshape a feature
 - Split a polygon
 - Merge polygons
- Lesson review

10 Spatial analysis

- Lesson introduction
- Spatial analysis workflow
- Types of analysis
- Geoprocessing tools
- Exploring the analysis environment
- Automating with ModelBuilder
- Multi-step geoprocessing with ModelBuilder
- Exercise 10: Answer questions using analysis tools
 - Import a map
 - Set analysis environments
 - Buffer data
 - Extract features from a layer
 - Perform an intersect between two layers
 - Explore results of the intersect
 - Use a spatial join to add attributes to a data layer
 - Summarize data
- Analysis in 3D
- Lesson review
- Answers to lesson 10 questions

11 Page layouts

- Lesson introduction
- What is a page layout?
- Map objectives
- Explore a page layout
- Creating a page layout
- Exercise 11: Create a page layout for analysis results
 - Open a map file
 - Create a layout

- Add a map frame
- Add a north arrow
- Add a scale bar
- Add a legend
- Add a map title

Lesson review

Answers to lesson 11 questions

12 Sharing with ArcGIS Pro

- Lesson introduction
- Sharing methods
- Sharing roles and permissions
- Exercise 12: Share analysis results
 - Export a layout
 - Share a map file
 - Share a map package
 - Share a web map
- Lesson review

Appendices

- Appendix A: Esri data license agreement
- Appendix B: Refined map example
- Appendix C: Answers to lesson review questions
- Appendix D: Additional resources
